

COMMONWEALTH OF PENNSYLVANIA
GOVERNOR'S OFFICE
HARRISBURG

ROBERT A. BITTENBENDER
SECRETARY
OFFICE OF THE BUDGET

December 10, 1997

Mr. Virgil F. Puskarich
Executive Director
Local Government Commission
Senate Box 203078
Main Capitol Building
Harrisburg, PA 17120-3078

Dear Mr. Puskarich:

In response to the request of the House Resolution 167 Task Force on local police services, this letter and its two enclosures address questions posed by the Commission at the September 24th meeting. These questions focused on the State Police's costs of providing local police services, and the basis for legislation that would establish a per capita charge on those localities that depend on the State Police for local police services.

In drafting the legislative proposal as a component of the 1997-98 Executive Budget, our purpose was to induce localities that use Commonwealth resources for local police protection, to begin using their own resources. Across the Commonwealth, 90% of localities with populations over 9,000 use their own tax dollars for local protection, and only 23 depend exclusively upon Commonwealth taxpayers. The central issue is one of equity – the costs of local police protection should be paid by local taxpayers. It is not equitable for other local governments to bear the cost of larger municipalities that elect not to fund local law enforcement.

In framing the parameters of the legislation, the Office of the Budget (OB) and the State Police (PSP) reviewed the components of cost in the operation of police forces. Incident response is one component of cost, but does not define the total cost of providing local protection. In addition, individual incidents vary widely in their complexity and the amount of time they consume. Therefore, comparisons based on a cost per incident are unrealistic. Charging localities on a "per incident" basis was rejected by OB and PSP as not only unworkable, but inequitable because it would allow localities to evade the substantial fixed costs of police services.

A per capita assessment is the only approach, which is both equitable and workable. In determining the per capita cost to be charged to a locality, OB and PSP reviewed reports on police costs and regional policing prepared by the former Department of Community Affairs. Our purpose was to determine an accurate and equitable cost for the local police protection afforded to these 23 communities. However, the cost must not inadvertently create an incentive to use the State Police rather than move the locality to provide its own police department, or reach an arrangement for regional policing.

PSP has calculated the total cost per incident (including overhead) for a response in locality to be \$468.09. However, the department is cognizant that this measure does not recognize the tremendous variation in time, complexity and resource requirements between incidents. It is also dependent upon the number of incidents, which occur in any given year. Therefore, the more meaningful measure, for the purposes of this discussion, is a per capita assessment of the costs of providing local police services to the 23 primary localities.

OB and PSP determined that assessing a charge of \$102 per resident for those localities of 9,000 population or more was the most equitable approach. The level of the assessment was based upon an average trooper salary and benefit cost of approximately \$28 per hour (1995-96), and an average amount of time spent on enforcement duties in these 23 localities of 3.69 hours per resident per annum. The threshold of 9,000 population was selected because a locality of this size clearly has the resources to maintain a full-time local police force. Complete data concerning all municipalities is attached.

Enclosure (1) contains the names of all municipalities within Pennsylvania along with the corresponding number of incidents for 1996, municipal population and the estimated cost of services incurred by PSP for that locality based upon the average cost figure. Enclosure (2) contains the listing of those municipalities considered non-primary jurisdiction, which have their own full-time police departments. This listing contains the population and incidents in 1996 within the locality.

We trust this information will be helpful to the task force.

Sincerely,

Robert A. Bittenbender
Secretary of the Budget

Colonel Paul J. Evanko
Commissioner
Pennsylvania State Police
